HEIGHT	23.81" (60.5cm)
WIDTH	15.5" (39.37cm)
DEPTH	13.25" (33.66cm)
WEIGHT	44 lbs. (20kg)

■ East Indian Rosewood

Note: East Indian Rosewood, like most exotic hardwoods, will vary dramatically in color, grain pattern, texture, and other naturally occurring characteristics. This is due to the seasonal or geographical differences which affect the growth patterns where the trees are harvested.

FINISH

EAST INDIAN ROSEWOOD

Klipsch is happy to announce a special edition production run of the Heresy in East Indian Rosewood. This exotic hardwood is genuine Rosewood and is regarded as one of the world's most beautiful hardwoods. The wood species is native to the southern Indian peninsula. The heartwood can vary from a golden brown to deep purplish brown, with dark brown streaks. The wood darkens with age, usually becoming a deep brown color. Rosewood is so named for the fragrance of roses the wood produces when first cut.

DESIGNED AND MADE IN THE USA

USING DOMESTIC AND IMPORTED COMPONENTS

The Klipsch Heresy III speaker is a testament to the quality Klipsch demands from each and every one of its audio products. Remember great sound? We do, too. The Klipsch Heresy III loudspeaker enclosure is still made in the USA, by proud craftsmen in Hope, Arkansas. Just like Paul W. Klipsch (PWK) intended.

FEATURES

SPECIAL EDITION

This production run is limited to 70 pairs of speakers. Each loudspeaker will feature a small edition plaque that is hand-signed by the craftsman.

COMPACT, THREE-WAY LOUDSPEAKER

The Heresy was originally introduced in 1957 as a compact three-way design utilizing a 12" woofer and horn-loaded midrange and tweeter. In 2006, the Heresy III was upgraded with a more powerful woofer, bi-wire network, as well as midrange and tweeter compression drivers, featuring a titanium diaphragm for smooth and accurate definition.

NEW NAMEPLATE AND GRILLE

Each pair of Heresys features "script" style nameplates mounted to a beautiful silver luster grille cloth.

NEW RISER

A matte-black slant riser base compliments the East Indian Rosewood.

BOOK-MATCHED WOOD VENEER

Klipsch only uses book-matched wood veneers for the Heritage series. The veneer leaves are kept in order as they are delicately sliced from the timber and precisely arranged to provide a mirror image at the splice joint – like turning the pages of a book. This gives each speaker an aesthetically appealing and consistent appearance that is treasured more than any other cut of wood veneer.

MATCHED PAIRS

Each pair of Heritage Series loudspeakers are grain-matched using wood veneer panels that come from the same timber. Each cabinet is carefully matched so that each speaker in the pair is practically indistinguishable from the other. The speakers move seamlessly together through the factory. Each finished product is inspected and labeled with sequential serial numbers, ensuring that the Heritage series speakers leave the factory as a meticulously crafted set.
