

PRO-8-SBR

SecureFit® Bracket Kit

CLEAN, COMPLETE PRE-WIRES

The Klipsch PRO-8-SBR SecureFit® Bracket Kit is a simple and flexible solution for future speaker placement and installation. The PRO-8-SBR is designed to give Klipsch in-ceiling speaker cutouts a finished, polished look prior to the final speaker installation, and guarantees that pre-wire or install brackets won't be lost in a closed ceiling. The rear mounted cardboard cover ensures blown-in or batt insulation won't fall through the cutout hole before or during speaker installation.

CLEAN, FINISHED LOOK

The Klipsch PRO-8-SBR SecureFit Bracket Kit includes a round, magnetic grille to visually resemble a speaker prior to the speaker purchase or installation. A magnetic plastic cover is also included to provide full vapor barrier protection, while a white eggshell finish allows it to disappear into white ceilings for a seamless look. Both the grille and cover are paintable to blend seamlessly into any décor.

EASY INSTALLATION

Patented SecureFit technology ensures easy installation without over-clamping or cracking drywall and is completely tool free when using the plastic cover. The grille bracket also matches the cutout for most Klipsch 8" in-ceiling speakers, so no additional measuring or cutting is needed when swapping it for a speaker. Even better, direct compatibility with Klipsch Pro Series SecureFit speakers means no swapping is necessary. Simply install the Pro Series SecureFit speaker directly into the SecureFit Bracket Kit. A robust construction and easy-to-remove design mean it's reusable from job to job.

PRO-6-SBR

SecureFit® Bracket Kit

CLEAN, COMPLETE PRE-WIRES

The Klipsch PRO-6-SBR SecureFit® Bracket Kit is a simple and flexible solution for future speaker placement and installation. The PRO-6-SBR is designed to give Klipsch in-ceiling speaker cutouts a finished, polished look prior to the final speaker installation, and guarantees that pre-wire or install brackets won't be lost in a closed ceiling. The rear mounted cardboard cover ensures blown-in or batt insulation won't fall through the cutout hole before or during speaker installation.

CLEAN, FINISHED LOOK

The Klipsch PRO-6-SBR SecureFit Bracket Kit includes a round, magnetic grille to visually resemble a speaker prior to the speaker purchase or installation. A magnetic plastic cover is also included to provide full vapor barrier protection, while a white eggshell finish allows it to disappear into white ceilings for a seamless look. Both the grille and cover are paintable to blend seamlessly into any décor.

EASY INSTALLATION

Patented SecureFit technology ensures easy installation without over-clamping or cracking drywall and is completely tool free when using the plastic cover. The grille bracket also matches the cutout for most Klipsch 6" in-ceiling speakers, so no additional measuring or cutting is needed when swapping it for a speaker. Even better, direct compatibility with Klipsch Pro Series SecureFit speakers means no swapping is necessary. Simply install the Pro Series SecureFit speaker directly into the SecureFit Bracket Kit. A robust construction and easy-to-remove design mean it's reusable from job to job.
